AUTOMATION AND CONTROLS FOR PROCESSING PLANTS

Built for Modern Production, Visibility, and Uptime.

Processing and manufacturing plants depend on controls that hold up under real production demands. When controls, drives, or visibility fall behind, downtime and quality risk follow.

The DSI Difference

DSI is a Rockwell Automation Silver System Integrator. Automation, electrical integration, panel fabrication, and commissioning come from one accountable team, so what happens on the plant floor matches the system design.

Work That Fits the Production Schedule

Automation work rarely happens on an idle plant. DSI supports phased work, coordination, and commissioning built around equipment-driven timelines.

Industrial Automation Capabilities

- PLC programming and control logic
- HMI and operator interface development
- SCADA and plant-wide visibility
- VFD, MCC, and drive integration
- UL control panel design and fabrication
- Instrumentation, commissioning, and startup

Employee-Owned Advantage

As a 100% employee-owned company, DSI crews own the result, not just the install. That drives safer work and systems plant teams can maintain.

THE INTEGRATED ADVANTAGE

FIVE SERVICES. ONE ACCOUNTABLE TEAM.

Most industrial projects are split across an electrical contractor, a panel builder, a fabricator, and an integrator, and the gaps between them are where schedules slip. DSI self-performs all five. One team owns the design, the build, and the result.

ELECTRICAL

Industrial construction, power distribution, MCCs, and switchgear.

AUTOMATION

PLC, HMI, and SCADA programming, telemetry, and modernization.

PANEL SHOP

UL 508A and UL 698A panels, including classified areas.

FABRICATION

Skids, e-houses, racks, platforms, and structural assemblies.

FIELD SERVICES

Emergency repair, R-Stamp welding, commissioning, and support.
