Municipal utilities depend on infrastructure that is safe, durable, and maintainable. Fabricated supports, structures, mounts, and platforms all have to fit the facility and the crews who service it.

The DSI Difference

DSI brings fabrication, electrical construction, automation, the panel shop, and field service together, so municipalities reduce vendor coordination and keep projects moving from concept through installation.

Access Is the Point

Operators and maintenance crews need safe, practical access to pumps, valves, panels, and instruments. Good fabrication does more than hold equipment in place.

Municipal Fabrication Capabilities

- Treatment plant equipment supports
- Lift and pump station structures
- Panel and enclosure support frames
- Access platforms, stairs, and railings
- Chemical feed and pipe supports
- Field modification and retrofit work

Employee-Owned Advantage

As a 100% employee-owned company, DSI fabricators own the result, not just the weld. That drives infrastructure communities can rely on for decades.

Talk with Our Municipal Fabrication Team

Send us your drawings, or the access problem you need solved. We will tell you what it takes to build it.

THE INTEGRATED ADVANTAGE

FIVE SERVICES. ONE ACCOUNTABLE TEAM.

Most industrial projects are split across an electrical contractor, a panel builder, a fabricator, and an integrator, and the gaps between them are where schedules slip. DSI self-performs all five. One team owns the design, the build, and the result.

ELECTRICAL

Industrial construction, power distribution, MCCs, and switchgear.

AUTOMATION

PLC, HMI, and SCADA programming, telemetry, and modernization.

PANEL SHOP

UL 508A and UL 698A panels, including classified areas.

FABRICATION

Skids, e-houses, racks, platforms, and structural assemblies.

FIELD SERVICES

Emergency repair, R-Stamp welding, commissioning, and support.
