When production equipment fails in the field, delays cost money and shortcuts create risk. DSI Field Services restores operations safely, quickly, and correctly.

The DSI Difference

DSI Field Services is National Board accredited to perform R-Stamp welding repairs. That means certified welders and procedures, full repair traceability, inspection and NDE verification, and compliance with original construction standards.

R-Stamp or Standard? We Decide First

Before any repair, DSI evaluates whether the work requires ASME R-Stamp welding or standard field welding. That call protects vessel certification and operating pressure ratings.

Field Services Capabilities

- Emergency oilfield repairs, 24/7 response
- ASME R-Stamp welding and vessel repairs
- Separator, tank, and piping repairs
- AWS certified pipe and structural welding
- Production equipment rebuilds
- Isometric drawings and repair documentation

Employee-Owned Advantage

As a 100% employee-owned company, DSI crews own the result, not just the repair. That drives work that holds up and documentation that protects the asset.

Talk with Our Field Services Team

Call when something fails, or before it does. We will tell you whether it needs an R-Stamp repair and what that takes.

THE INTEGRATED ADVANTAGE

FIVE SERVICES. ONE ACCOUNTABLE TEAM.

Most industrial projects are split across an electrical contractor, a panel builder, a fabricator, and an integrator, and the gaps between them are where schedules slip. DSI self-performs all five. One team owns the design, the build, and the result.

ELECTRICAL

Industrial construction, power distribution, MCCs, and switchgear.

AUTOMATION

PLC, HMI, and SCADA programming, telemetry, and modernization.

PANEL SHOP

UL 508A and UL 698A panels, including classified areas.

FABRICATION

Skids, e-houses, racks, platforms, and structural assemblies.

FIELD SERVICES

Emergency repair, R-Stamp welding, commissioning, and support.
